### **Election/Restriction**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-3, drawn to an apparatus comprising a support cart having a front end, a rear end, a docking plate, and a hydraulic pressure system; a conveyor means and a mechanical sweeper, classified in Class 134, subclass 166R.

Group II: Claim 4, drawn to a method for removing wine pomace from a fermentation tank, classified in Class 134, subclass 22.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (M.P.E.P. § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as without a support cart having a docking plate and a hydraulic pressure system or the apparatus as claimed can be used to practice another and materially different process such as transferring objects from the tank.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Gary Hoenig on July 18, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
